LED Specification

EC/Opto Group

GW5BQFxxKx3 Series LED Module for Lighting Applications

Product Specification January 2011

"Mini-Zenigata" Module: High-output (7 W), 2700 K - 6500 K LED Module (430 - 560 lm) High Color Rendering (80 - 85 CRI) suited for lighting applications

SHARP

Spec No.	DG-106008C
Issue	31-Jan-11

S P E C I F I C A T I O N S

Product Type

ZENIGATA LED

Model No.

GW5BQF**K*3

**K*3 : 27K03, 30K03, 35K03 40KH3, 50K03, 65K03

Reference

These specifications contain <u>20</u> pages including the cover and appendix. If you have any objections, please contact us before issuing purchasing order.

• Handle this document carefully for it contains material protected by international copyright law. Any reproduction, full or in part, of this material is prohibited without the express written permission of the company.

• When using the products covered herein, please observe the conditions written herein and the precautions outlined in the following paragraphs. In no event shall the company be liable for any damages resulting form failure to strictly adhere to these conditions and precautions.

(1) Please do verify the validity of this part after assembling it in customer's products, when customer wants to make catalogue and instruction manual based on the specification sheet of this part.

(2) The products covered herein are designed and manufactured for the following application areas. When using the products covered herein for the equipment listed in paragraph (3), even for the following application areas, be sure to observe the precautions given in Paragraph (3). Never use the products for the equipment listed in Paragraph (4).

- \cdot Office electronics
- ·Instrumentation and measuring equipment
- Machine tools
- · Audiovisual equipment
- Home appliances
- · Communication equipment other than for trunk lines
- (3) These contemplating using the products covered herein for the following

equipment which demands high reliability, should first contact a sales representative of the company and then accept responsibility for incorporating into the design fail-safe operation, redundancy, and other appropriate measures for ensuring reliability and safety of the equipment and the overall system.

·Control and safety devices for airplanes, trains, automobiles, and other

- transportation equipment
- · Mainframe computers
- ·traffic control systems
- ·Gas leak detectors and automatic cutoff devices
- ·Rescue and security equipment
- ·Other safety devices and safety equipment, etc.

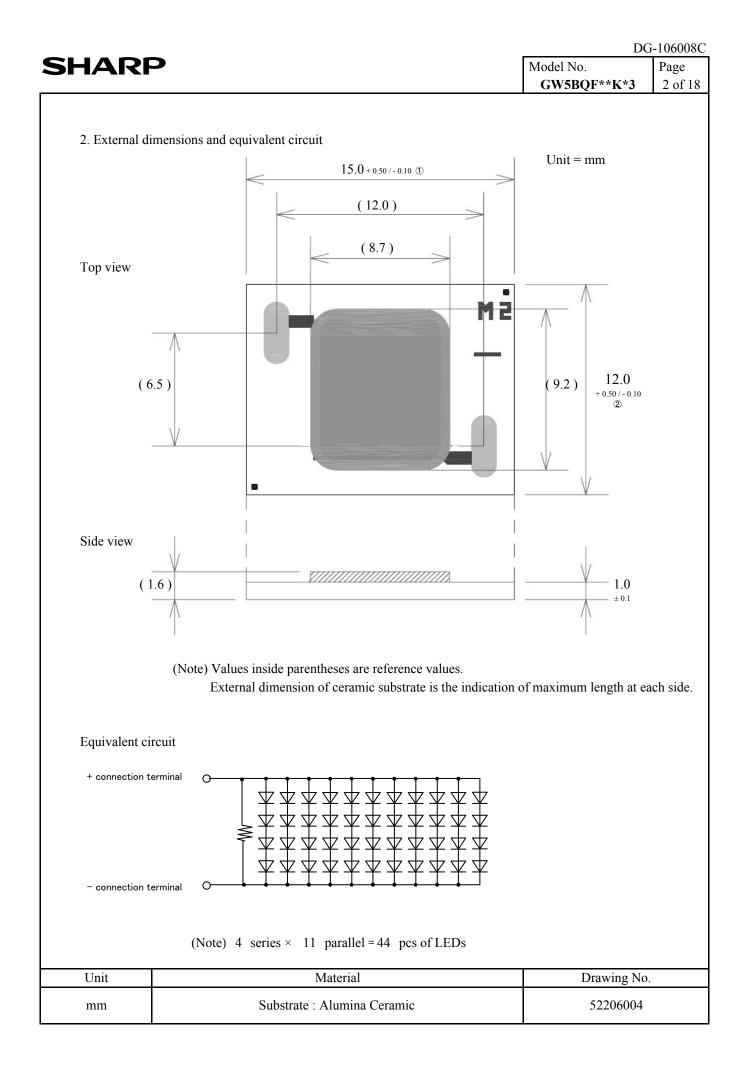

(4) Do not use the products covered herein for the following equipment which

demands extremely high performance in terms of functionality, reliability, or accuracy.

- ·Aerospace equipment
- ·Communications equipment for trunk lines
- ·Control equipment for the nuclear power industry
- ·Medical equipment related to life support, etc.
- (5) please direct all queries and comments regarding the interpretation of the above four Paragraphs to a sales representative of the company.

 Please direct all queries regarding the products covered herein to a sales representative of the company.

GW5BQF**K*3 specificatio	ons		
1. Application			
These specifications apply to the light emitting diode module Mo	del No. GW5	BQF**K*3.	
[LED module (InGaN Blue LED chip + Phosphor)]			
Main application : Lighting			
2. External dimensions and equivalent circuit	Refer to	Page 2.	
3. Ratings and characteristics	Refer to	Page 3 - 5.	
3-1. Absolute maximum ratings			
3-2. Electro-optical characteristics			
3-3. Derating curve			
4. Reliability	Refer to I	Page 6.	
4-1. Test items and test conditions			
4-2. Failure criteria			
5. Quality level	Refer to I	Page 7.	
5-1. Applied standard		C	
5-2. Sampling inspection			
5-3. Inspection items and defect criteria			
6 Supplements	Dafar ta D	$a = \frac{9}{14}$	
6. Supplements	Refer to P	age 8 - 14.	
6-1. Chromaticity rank table			
6-2. Packing 6-3. Label			
6-4. Indication printed on product			
0-4. Indeation printed on product			
7. Precautions	Refer to P	age 15 - 17.	
8. Characteristics diagram (TYP.)	Refer to	Page 18	
6. Characteristics diagram (111.)		1 age 10.	

SHARP

- 3. Ratings and characteristics
- 3-1. Absolute maximum ratings

Item	Symbol	Rating	Unit
Power Dissipation *1,4	Р	8.7	W
Forward Current *1,4	I _F	600	mA
Reverse Voltage *2,4	V _R	-15	V
Operating Temperature *3	T _{opr}	- 30 ~ + 90	°C
Storage Temperature	T _{stg}	- 40 ~ + 100	°C

*1 Power dissipation and forward current are the value when the module temperature is set lower than the rating by using an adequate heat sink.

- *2 Voltage resistible at initial connection error (Not dealing with the possibility of always-on reverse voltage.)
- *3 Case temperature Tc (Refer to measuring point for case temperature in the next page.) Refer to "Derating curve" in the next page as for operating current.

*4 T_c = 25 $^{\circ}$ C

7. Precautions				
① Storage conditions				
Please follow the cor				
-	mperature 5 \sim 30 °C, Relative humidity less the	than 60 %.		
· -) should be used within a year)	<pre></pre>		
-	perature 5 \sim 30 °C, Relative humidity less that	an 60 %.		
(Please apply solder	hould be kept in an aluminum moisture proof b	hag with a m	aistura	
absorbent material (s		bag with a m	oisture	
,	air with corrosive gas.			
	e surface would be damaged, which may affect	t soldering.		
② Usage conditions		4		
	esigned for the use under any of the following		4 6 11	
	rmance and reliability well enough if you use u	•	-	ons;
(Cl, H_2S, NH_3, SO_2)	t of moisture, dew condensation, briny air, and , $\mathrm{NO}_{X_{\text{-}}}$ etc.)	a corrosive ga	18.	
	nlight, outdoor exposure, and in a dusty place.			
• In water, oil, medic	cal fluid, and organic solvent.			
③ Heat radiation				
	a) is applied to single-state module at any curre	ent, there is a	risk of damaging LE	D
or emitting smoke.				
Equip with specified	heat radiator, and avoid heat stuffed inside the	e module.		
④ Installation				
	lumina ceramic. If installed inappropriately, tro eat. Please take particular notice for installation		adiation may occur d	ue to
Refer to the following	g cautions on installation.			
Apply thermolysis	s adhesive, adhesive sheet or peculiar connecto	or when mour	nted on heat radiator.	
	g adhesive or adhesive sheet only, check the ef		-	-
	from heat radiator, unusual temperature rise er		ous phenomena inclue	ding
	on, coming off of solder at leads, and emitting			1 1 0

	affect light output or color due to change of r			

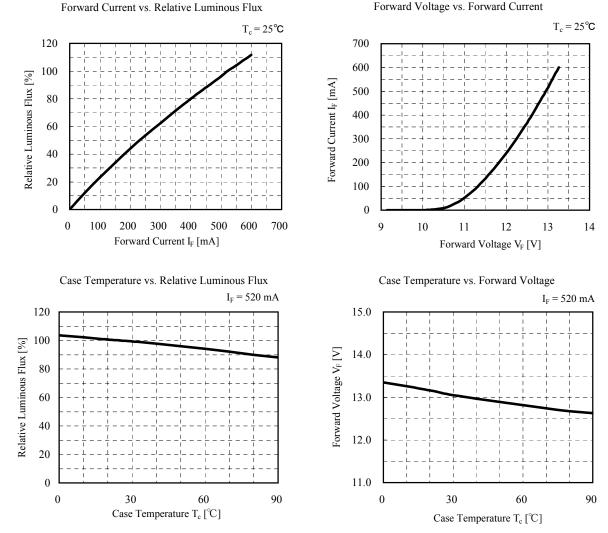

HARP	Model No. GW5BQF**K*3	G-106008 Page 16 of 1
 Do not touch resin part including white resin part on the surface of No light emission may occur due to damage of resin or cutting wire When using tweezers, please handle by ceramic substrate part and a For mounting, please handle by side part of ceramic or the specified 	e of LEDs by outer force. avoid touching resin part.	
 ⑤ Connecting method In case of solder connecting method, follow the conditions mentioned Use Soldering iron with thermo controller (tip temperature 380 °C). Secure the solderwettability on whole solder pad and leads. During the soldering process, put the ceramic board on materials whot to radiate heat of soldering. Warm up (with using a heated plate) the substrate is recommended be (preheat condition: 100 °C ~ 150 °C, within 60 sec) Avoid touching a part of resin with soldering iron. 	, within 5 seconds per one place nose conductivity is poor enough	
 This product is not designed for reflow and flow soldering. Avoid such lead arrangement as applying stress to solder-applied are Please do not detach solder and make re-solder. Please solder evenly on each electrodes. Please prevent flux from touching to resin. 	ea.	
⑥ Static electricity This product is subject to static electricity, so take measures to cope w Install circuit protection device to drive circuit, if necessary.	vith it.	
 ⑦ Drive method Any reverse voltage cannot be applied to LEDs when they are in op Design a circuit so that any flow of reverse or forward voltage can now when they are out of operation. Module is composed of LEDs connected in both series and parallel. Constant voltage power supply runs off more than specified current a caused by temperature rise. Constant current power supply is recommended to drive. 	t be applied to LEDs	
⑧ Cleaning Avoid cleaning, since silicone resin is eroded by cleaning.		
O Color-tone variation Chromaticity of this product is monitored by integrating sphere right a Chromaticity varies depending on measuring method, light spread cor Please verify your actual conditions before use.	-

10 Safety		
•Looking directly at LEDs for a long time may result in hurt you	r eyes.	
•In case that excess current (over ratings) are supplied to the dev	5	Ş
abnormal heat generation, emitting smoke, or catching fire can		
Take appropriate measures to excess current and voltage.		
• In case of solder connecting method, there is a possibility of fat	igue failure by heat.	
Please fix the leads in such case to protect from short circuit or	leakage of electricity caused by cont	act.
	n devices	
• Please confirm the safety standards or regulations of application		

Guarantee covers the compliance to the quality standards mentioned in the Specifications, however it does not cover the compatibility with application of the end-use, including assembly and usage environment.

In case any quality problems occurred in the application of end-use, details will be separately discussed and determined between the parties hereto.
