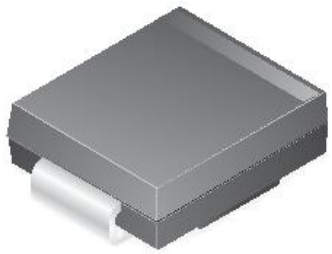
1500W Transient Voltage Suppressor

FEATURES

- Glass passivated junction
- 1500W peak pulse power capability on 10/1000μs waveform
- Excellent clamping capability
- Low-Incremental surge resistance
- Fast response time: Typically less than 1.0ps from 0V to BV minimum for unidirectional and 5.0ns for bidirectional
- Typical I_R less than 1μA above 10V
- UL certificate #E258596
- UL94V-0 flammability classification



SMC/DO-214AB

Band denotes cathode on unidirectional devices only. No band on bi-directional devices. Bi-directional types have CA suffix where electrical chatacteristics apply in both directions suitable for bi-directional applications.

ABSOLUTE MAXIMUM RATINGS

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only. Values are at T_A = 25°C unless otherwise noted.

PARAMETER	SYMBOL	VALUE	UNIT
Peak pulse power dissipation t_p=1ms	P_{PPM}	1500	W
Peak pulse current on 10/1000μs waveform	I_{PPM}	see table	A
Non-Repetitive Peak Forward Surge Current Superimposed on Rated Load (JEDEC Method)(1)	I_{FSM}	200	A
Junction temperature	T_J	-55 to +150	°C
Storage temperature	T_{STG}	-55 to +150	°C

Note:

1. Measured on 8.3ms single half-sine wave; duty cycle = 4 pulses per minute maximum.

Notes:

2. Color band denotes cathode on unidirectional devices only. No color band on bidirectional devices.
3. For bidirectional parts with V_{RWM} < 10 V, the I_R max limit is doubled.
