### Supplier Name: Texas Instruments Inc. (DUNS# 00-732-1904) Contact Info: ti.com/support Distribute - RoHS and IEC 62474 DB Form/Declaration Type: 06/02/2022 Created on:

## Details for "LMV612MMX/NOPB"

## **Current Product Information**

TI part number	Lead finish/Ball material	MSL rating/peak reflow	Assembly site	Package   Pins	Package body size (mm)	Total device mass (mg)*
LMV612MMX/NOPB	SN	Level-1-260C-UNLIM	Texas Instruments Electronics	DGK   8	3 x 3 x 1	30.8

## \*Total Device Mass

The summary mass is a rounded value and will be within approximately +/- 10% of the detailed mass value.

## Environmental Ratings Information

RoHS	REACH	Green	IEC 62474 DB
Yes	Yes	Yes	Yes

## Component Information

				Homogeneous Material Level		Component Level				
Component	Substance	CAS Number	Amount (mg)	Percentage %	ppm	Percentage %	ppm			
Bond Wire										
Copper and Its Alloys	Copper	7440-50-8	0.030998	100	1000000	0.100501	1005			
Sub-Total			0.030998	100	1000000	0.100501	1005			
Die Attach Adhesive	Jie Attach Adhesive									
Precious Metals	Silver	7440-22-4	0.098226	75	750000	0.318467	3185

### Important Note

The pom calculations are at the homogeneous material level and are maximum concentration values. The pom displayed represents the homogeneous material with the highest pom

The procession of the amount (mg) calculations represent the maximum total amount of each substance within the component. The procession are at the **component** level and are average concentration values. The amount (mg) calculations represent the average total amount of each substance within the **component**. See Glossary of Terms for more details.

There is a remote possibility the Customer Part Number (CPN) your company uses could reference more than one TI part number. This is due to two or more users (EMSIs or subcontractors) using the same CPN for different TI part numbers. If this occurs, please check your Customer Part Number and cross reference it with the TI part number seen on this page

# Product Content Methodology For an explanation of the methods used to determine material weights, See Product Content Methodology

## Material Declaration Certificate for Semiconductor IC Packaged Products

TI certifies that the material content information provided by TI is representative and accurate to the best of their knowledge based on material information provided by its suppliers and their combination into finished IC packaged products. TI semiconductor products designated to be "Pb-free", "Green" or "RoHS Exempt" fully meets the latest EU RoHS Directive requirements along with other legislation as seen in the former JIG-101 list that has been transferred to the IEC 62474 database.

## Important Information/Disclaimer

TI bases its material content information on information provided by third-party suppliers and has taken, and continues to take, reasonably diligent steps to provide any required or available information. TI may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. Thand T supplies and provide of provide and provide and

RoHS: Means TI semiconductor products that are compliant with the current RoHS requirement that the maximum concentration values of the ten substances listed in RoHS Annex II do not exceed 0.1 % by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI semiconductor products labeled as "RoHS Compliant" are suitable for use in specified lead-free processes. TI may also reference these types of semiconductor products as "Pb-Free." These TI semiconductor products are also fully compliant with GADSL and the IEC 62474 database for electronic requirements.

RoHS Exempt: Means TI semiconductor products that contain lead (Pb) above the RoHS Annex II threshold, but that fall within one of the specific RoHS exemptions noted above or documented in http://www.ti.com/lit/pdf/szzq088

Green: Means the content of Chlorine (Cl) and Bromine (Br)-based flame retardants meet JS709B low halogen requirements of <=1 000ppm threshold; Antimony trioxide (Sb203) contained in halogen based flame retardant materials meets the <=1 000ppm threshold requirement; and Beryllium Oxide (BeO) is <=1000ppm.
