

## Statement of Compliance

**Requested Part** 

(Part 1 of 1) 24 November 2017 207120-1 METRIMATE PIN HEADER ASSY,12P Part Status: Pending Obsolescence Mil-Spec Certified: No EU RoHS: Not Compliant Substances: Pb EU ELV: Not Compliant Substances: Pb China RoHS: 26 Restricted Materials Above Threshold Regulation (EC) No. 1907/2006 EU REACH SvHC Compliance: Current ECHA Candidate List: JUL 2017 Candidate List Declared Against: JUNE 2016 Does not contain REACH SvHCs Halogen Content: Not Yet Reviewed for halogen content Solder Process Capability Code: Wave solder capable to 265°C Material Declarations: MD\_207120-1 **TE Connectivity Corporation** 

1050 Westlakes Drive

Berwyn, PA 19312

This information is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information they provided. This information is subject to change.

The part numbers that TE has identified as EU RoHS compliant have a maximum concentration of 0.1% by weight in homogenous materials for lead, hexavalent chromium, mercury, PBB, PBDE, and 0.01% for cadmium, or qualify for an exemption to these limits as defined in the Annexes of Directive 2011/65/EU (RoHS2). Finished electrical and electronic equipment products will

be CE marked as required by Directive 2011/65/EU. Components may not be CE marked.

Additionally, the part numbers that TE has identified as EU ELV compliant have a maximum concentration of 0.1% by weight in homogenous materials for lead, hexavalent chromium, and mercury, and 0.01% for cadmium, or qualify for an exemption to these limits as defined in the Annexes of Directive 2000/53/EC (ELV).

Regarding the REACH Regulations, TE's information on SVHC's in articles is currently based on the European Chemicals Agency (ECHA) 'Guidance on requirements for substances in articles' (Version: 2, April 2011), applying the 0.1% weight on weight concentration threshold at the finished product level. TE is aware of the European Court of Justice ruling of September 10th, 2015 stating that, in case of 'complex articles', the threshold for a SVHC must be applied to both the product as a whole and simultaneously to each of the articles forming part of its composition. To make sure our REACH information stays in line with the changed legal interpretation and industry practices, TE is monitoring evaluations of this ruling and awaits the expected new ECHA guidance on the practical implementation.
