PCN #:P-20-018820

Subject:AMP MCP 2.8

Description of Change: Standardization of the silver material for the AMP MCP 2.8. The Plating has changed in the connection area from Ag to Sn (state of the art for connection areas). The base material and the plating in the contact area remain the same. AMP MCP 2.8 Revision E revised to Rev F for all silver variants, except PN 1-2141857-3, PN 1-2141858-3, PN 1-2141859-3, PN 1-2141860-3, PN 1-1719506-3, PN 1-2282364-3, PN 1-2236751-3 and PN 1-2236752-3 revised from Rev A to Rev B.

Reason: Part status change. The new silver-plating material for the AMP MCP 2.8 is already used for the 2.8mm SFC. This increases the delivery reliability of the silver material.

The dates on the product change notification (PCN) are best estimate dates determined at the time of issuance. Actual implementation dates may vary from such dates.

The change described in the PCN can be withdrawn, without notice, for any or all of the products identified on the PCN.

TE Connectivity corporate policy is for PCNs to be valid for 60 days and obsolescence notices to be valid for 180 days after date of issue.

For confirmation or additional information on the change, please contact the TE Connectivity Product Information Center at 800-522-6752 or your TE Connectivity Sales Representative.
