PCN #:P-15-011614

Subject:Compound Reformulations and Process Transfers of US-Made BST

Description of Change: One of the components used in manufacturing several of our heavy duty tubing products has been made obsolete by the supplier. To continue to service our valued customers, we are announcing that TE Connectivity will be qualifying a new supplier of the ingredient for compounds used to manufacture these products. The new ingredient is chemically equivalent to the current ingredient. The affected products will continue to meet the AMS-DTL-23053/15, American Bureau of Shipping and Lloyd s Register of Shipping standards along with TE s RW-2017, RW-2011, and RW-2016 specifications. The compound formulation changes along with processing transfers within the Menlo Park, CA manufacturing site (between buildings and equipment) will take effect by July 1, 2015. TE plans to conduct running changes for the reformulation.

Reason: Part status [change.TE](#) Connectivity believes these changes will not affect the form, fit or function of the products. TE also recommends that our customers conduct their own evaluation of these products in the specific applications where they are used. Samples and qualification reports will be available to customers upon request through TE s sales channels starting May 1, 2015.

Impact of Change:form - fit - function

The dates on the product change notification (PCN) are best estimate dates determined at the time of issuance. Actual implementation dates may vary from such dates.

The change described in the PCN can be withdrawn, without notice, for any or all of the products identified on the PCN.

TE Connectivity corporate policy is for PCNs to be valid for 60 days and obsolescence notices to be valid for 180 days after date of issue.

For confirmation or additional information on the change, please contact the TE Connectivity Product Information Center at 800-522-6752 or your TE Connectivity Sales Representative.
