

09-Oct-2015

PCN #:P-15-012140

**Subject:**Capacity Expansion of ES-CAP Heat-Shrink Tubing

**Description of Change:** This notification is to inform you that as part of our continued investment and commitment to provide extraordinary customer experience, TE Connectivity will be increasing manufacturing capacity for the ES-CAP, PD-Cap and TAK-Cap product families. An additional manufacturing capacity for forming and cutting operation will be implemented in North America within the next 90 (ninety) days in our manufacturing plant based in Menlo Park, CA. This additional capacity will deliver manufacturing contingency and process enhancements. Products manufactured with the additional capacity will be qualified to the same TE release specification RW-3006. The implementation of the new capacity follows a TE internal strict procedure, which maintains quality, ability to supply and form-fit-function as specified by TE of the products within this notification. The manufacturing location operates under an ISO/TS-16949 certified quality management system in accordance with standard automotive requirements.

**Reason:** Product [improvement.TE](#) Connectivity believes this additional capacity of manufacturing will not affect the form, fit or function of the products as specified by TE Connectivity. The implementation does not require any change in product descriptions and part numbers. Details can be found in appendix A of the attached PCN Bulletin. If you require a PPAP, please notify the responsible TE Sales Contact within 14 calendar days after receipt of this notification. IMDS submission are available from [IMDS@te.com](mailto:IMDS@te.com). TE Connectivity will reserve the right to supply these Heat-Shrink Tubing to its customers concurrently from the existing capacity as well as the future implemented capacity from Menlo Park, US and from Trutnov, Czech Republic location. TE also recommends our customers to conduct their evaluation for the specific applications where these products are designed, should that become necessary.

**Impact of Change:**form - fit - function

## **Key Dates:**

The dates on the product change notification (PCN) are best estimate dates determined at the time of issuance. Actual implementation dates may vary from such dates.

The change described in the PCN can be withdrawn, without notice, for any or all of the products identified on the PCN.

TE Connectivity corporate policy is for PCNs to be valid for 60 days and obsolescence notices to be valid for 180 days after date of issue.

For confirmation or additional information on the change, please contact the TE Connectivity Product Information Center at 800-522-6752 or your TE Connectivity Sales Representative.
