

05-Dec-2017 **PCN** #:E-17-016543

**Subject:** WM-4S, WM-6S, WM-8S DTM Series 4-way, 6-way, and 8-way Plug Wedge Locks

**Description of Change:** An optional cutout feature will be added to the wedge locks in the "blade" area.

Reason: Product Improvement. Dear Customer, in an effort to continuously improve our products, TE-ICT will be adding new wedge lock molds to add to our production capacity with a cutout feature that is needed to facilitate manufacturability. While there is an impact to the part form, the fit and function of the part is not impacted. This change will give manufacturing the option to use the existing molds or new molds. This product improvement will not impact other areas of wedge lock performance. Shipments of both revisions may be mixed. "Optional Cutout Feature" callout will be added to the product drawings. IMPORTANT: This is a continual improvement so the current and previous revisions of these part can be used interchangeably in the field. These changes are being phased in gradually and previous revision can remain stocked until use.

Impact of Change: form - fit - function

**Key Dates:** 

Contact By Date: 10-Jan-2018

Implementation Date: 10-Jan-2018

The dates on the product change notification (PCN) are best estimate dates determined at the time of issuance. Actual implementation dates may vary from such dates.

The change described in the PCN can be withdrawn, without notice, for any or all of the products identified on the PCN.

TE Connectivity corporate policy is for PCNs to be valid for 60 days and obsolescence notices to be valid for 180 days after date of issue.

For confirmation or additional information on the change, please contact the TE Connectivity Product Information Center at 800-522-6752 or your TE Connectivity Sales Representative.
