

29-May-2018

PCN #:P-18-015882

Subject:Assembly, Socket, AMPSEAL 16

Description of Change: In an effort to raise our customer service and improve delivery of quality product to customer requested dates, TE Connectivity will be adding a second forming die to produce components required for socket assemblies. This die is a duplicate of the existing tool and will increase output as it will allow two forming dies to be ran simultaneously. There will be no changes to the quality of the product manufactured with the additional forming die as there are no changes to the product design or manufacturing process. An internal release based on TE Connectivity specifications and standards will be executed prior to any parts being delivered to verify product performance.

Reason: Product improvement. The addition of a second forming die will better allow TE Connectivity to meet current demands and serve future needs of customers.

Impact of Change:form - fit - function

The dates on the product change notification (PCN) are best estimate dates determined at the time of issuance. Actual implementation dates may vary from such dates.

The change described in the PCN can be withdrawn, without notice, for any or all of the products identified on the PCN.

TE Connectivity corporate policy is for PCNs to be valid for 60 days and obsolescence notices to be valid for 180 days after date of issue.

For confirmation or additional information on the change, please contact the TE Connectivity Product Information Center at 800-522-6752 or your TE Connectivity Sales Representative.
