Subject:RT2 pol Power PCB Relay with gold plated contacts

Description of Change: To continue TE's program called -smart design on Silver use- the gold plated C/O-contacts of the 2 pole RT-series are to be modified from solid to tri-metal (plated) versions like already implemented in the non gold RT2 pol Power PCB Relay versions in the year 2012 (as communicated via PCN P-12-008163). Additionally, the thickness of the gold plating will be reduced on average by 1um. The performance of the relays will not be affected by this change. To ensure traceability modified products can be identified by date code 1942 or later.

Reason: Product Improvement.
