Subject:23 position AMPSEAL Right Angle header assembly (Asia Pacific customers only)

Description of Change: The Industrial and Commercial Transportation business unit of TE Connectivity will be moving a molding module that produces the 23 position right angle header housing from Tullahoma TN facility to the Empalme Mx facility. the new header housing will be designated as cavity D5. This change will take place immediately so that customer delivery will not be affected. PPAP or sample requests must be submitted within 14 days of PCN submission via ict-ppap-request@te.com or the ePPAP system. Submission will not occur without a request. If PPAP is requested, disposition response is required within 14 days of submit date or it will be considered approved. NOTE: This change does not affect customers outside the Asia Pacific region

Reason: Dear customer, we hereby inform you of this change. This change is necessary to replace the current molding module which has surpassed its end of life usage. The change will not impact connector performance.
IMPORTANT: The current and previous revisions of these parts can be used interchangeably in the field and previous revisions can remain stocked until used. Drawings are not affected by this change
