

12-Dec-2019

PCN #:E-19-016902

Subject:RZ Relay

Description of Change: Cover fixing of RZ relays will be slightly changed by increasing the length of the case hot embossing (see picture below). This supports production process stabilization as well as fixation strength of the case on the relay base (this change is not valid for RZ reinforced flux proof versions, e.g. RZ Haz Loc, RZ socketable and RZ -R). Additionally TE is changing the datecode format at RZ relay from four digits YYWW (Year-Year-Week-Week) to six digits to improve the traceability of produced relays. New format will show YYWWDS (Year-Year-Week-Week-Day-Shift). Example given: 19452B means Year 2019, Calendar Week 45, Tuesday, 2nd shift of this day. For detailed information regarding the change please contact your sales representative or Field Application Engineer. All parameters and approved performance/ratings remain unchanged.

Reason: Product Improvement. Dear Customer, you are receiving this notice because TE Connectivity has record of you purchasing a part or multiple parts on the list below. These parts are affected by the change mentioned above!

Key Dates:

Contact By Date:11-Feb-2020

Implementation Date:11-Feb-2020

The dates on the product change notification (PCN) are best estimate dates determined at the time of issuance. Actual implementation dates may vary from such dates.

The change described in the PCN can be withdrawn, without notice, for any or all of the products identified on the PCN.

TE Connectivity corporate policy is for PCNs to be valid for 60 days and obsolescence notices to be valid for 180 days after date of issue.

For confirmation or additional information on the change, please contact the TE Connectivity Product Information Center at 800-522-6752 or your TE Connectivity Sales Representative.
