TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

HCR Stamping Tools Insourcing

Description of Changes

Insourcing of HCR150 Stamping Tools. Stamping tools will be transferred from the actual Outside Vendors to TE vora (PT). This will only affect components manufacturing location. No material nor function is affected. The production location of the correspondent finished TE-product remains unchanged. This PCN is for information purposes only, with no need to release this change.

Reason for Changes:

Dear Customer, as a result of our continuous strive for improving our processes, we hereby inform you about a transfer of tools. The transfer is executed by following a strict transfer procedure, which guarantees no negative influence on quality, ability to supply and form-fit-function of the concerned products. The new manufacturing location is under a certified quality management system according the standard industry requirements. An internal release based on our specifications will be executed before any parts will be delivered, which guarantees the performance. Due to the actual COVID situation and raw materials shortage, the initial plan of insourcing was splitted in 2phases. This PCN corresponds now to 1st phase. The 2nd phase will be planned in the meantime, to be started only after the 1st one is implemented. On appropriate time, a new PCN will be issued for the 2nd phase.
