PCN #:P-21-021032

Subject:Power F increase of Regrind usage

Description of Change: Dear customer, due to the actual delivery situation with plastic material and various raised force majeure of resin suppliers we are forced to introduce a higher amount of regrind in the plastic components of our relays. This is a further step on TE's way to increase the sustainability of our products. In the first step we introduce this change for the covers and bases. This PCN is only for information purpose. There is no change in form, fit or function and no drawing change. An approval is not required. TE Connectivity Sales Team will answer your questions on any additional information or clarification that may be needed in that respect.

Reason: Product improvement.

The dates on the product change notification (PCN) are best estimate dates determined at the time of issuance. Actual implementation dates may vary from such dates.

The change described in the PCN can be withdrawn, without notice, for any or all of the products identified on the PCN.

TE Connectivity corporate policy is for PCNs to be valid for 60 days and obsolescence notices to be valid for 180 days after date of issue.

For confirmation or additional information on the change, please contact the TE Connectivity Product Information Center at 800-522-6752 or your TE Connectivity Sales Representative.

Alert document created by IHS Markit based on content provided by TE Connectivity.
