TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

AMPLIMITE Plug and Receptacle Assemblies

Description of Changes

Changing connector part marking process from ink to laser marking. TE Connectivity has received DLA approval to implement laser marking of M24308 Mil qualified assemblies. Laser marking will be used on all Military and Commercial AMPLIMITE assemblies.

Reason for Changes:

Product improvement. Change eliminates the use of ink and chemicals required to mark and test the permanency of the ink marking per M24308 requirements.
