

01-Aug-2023

PCN #: P-23-024894

Subject : Change to Specification Control Drawing (SCD) to adjust Life Cycle test weight requirement for 44A031X product

Description of Change : The weights for the life cycle test on 44A031X products were found to be disproportionate when compared to other similar 44A constructions. The new test weights for life cycle have been selected based on the ratio of the test weight to the insulation weight. These are now proportional to 44A011X products. There is no change to other specification requirements. There is no change to product design, formulation, or manufacturing methods.

Note: (44A031X) X Denotes conductor plating types, Tin, Silver, Nickel

Reason : Document clarification. The weights for the life cycle test on 44A031X products were found to be disproportionate when compared to other similar 44A constructions. The mechanical performance of 44A031X and 44A011X product is designed to be similar, however the electrical performance of 44031X (2500V) is much superior to 44A011X (600V).

The new test weights for life cycle have been selected based on the ratio of the test weight to the insulation weight. These are now proportional to 44A011X products.

The dates on the product change notification (PCN) are best estimate dates determined at the time of issuance. Actual implementation dates may vary from such dates.

The change described in the PCN can be withdrawn, without notice, for any or all of the products identified on the PCN.

TE Connectivity corporate policy is for PCNs to be valid for 60 days and obsolescence notices to be valid for 180 days after date of issue.

For confirmation or additional information on the change, please contact the TE Connectivity Product

Information Center at 800-522-6752 or your TE Connectivity Sales Representative.

Alert document created by IHS Markit based on content provided by TE Connectivity.
