PCN #:P-13-009570

Subject:Material Relocation Change

Description of Change: In an effort to raise our customer service and improve delivery of quality product to the customer requested dates. TE Global Automotive Division will be adding an additional existing material vendor to meet our raw material supply demands. These facilities are TS16949 and ISO9000/1 certified. There will be no change to raw material composition nor will electrical, mechanical and environmental performances be affected.

Reason: Product improvement. The addition of the alternate vendor is being added to address uncompetitive quotes. Dual sourcing will assure uninterrupted material supply while minimizing the impact of raw material cost escalations. For multiple terminal family configurations, a generic dimensional report will be issued to save time by reducing repetitive measurements. Any questions please contact your TE connectivity Sales Engineering representative.

Impact of Change:form - fit - function

Key Dates:

Contact By Date:25-Jul-2014

Implementation Date:25-Jul-2014

Product Affected
