

25-Jul-2014

PCN #:P-14-010377

Subject:TE's program "smart design on Silver use" for TSC Relay

Description of Change: The NO, CO and NC contacts of the TSC series for the AgNi gold plated contacts are to be modified from massive to bi-metal versions. Numerous tests have been completed and TE confirms the same performance for the plated contacts. Start for implementation into the series production is planned for CW40/2014.

Reason: Product improvement. This change is being made to align the AgNi gold plated contact material, There is no change being made to the contact material or composition.

Impact of Change:form - fit - function
