APPLICATIONS

Temperature measurement, sensing and control in remote locations and for various environmental conditions, indoor or outdoor.

Typical applications include, for example:

- Air-conditioning sensors
- Evaporator sensors
- Industrial sensors
- Heating systems sensors

DESCRIPTION

These negative temperature coefficient thermistors consist of a mini-chip soldered to a twin stranded tin plated copper AWG #30, 105 °C resistant, PVC (UL2651) wire and potted in a nickel plated brass pipe. Terminations are tin solder dipped.

MOUNTING

By soldering or clamping the wire ends, in any position. Body can be inserted, glued or taped attached to a surface, pipe or mounting hole. Not intended for fluid immersed applications.

DESIGN-IN SUPPORT

- Other R/T curves available on request
- The lead length can be customized
- Connectors or ferrules can be added to the wire end
