

Ultrabright LED, $\varnothing$ 5 mm Untinted Non-Diffused

Description

The TLC.51.. series is a clear, non diffused 5 mm LED for high end applications where supreme luminous intensity required.

These lamps with clear untinted plastic case utilize the highly developed ultrabright AlInGaP (AS) and InGaN technologies.

The lens and the viewing angle is optimized to achieve best performance of light output and visibility.

19223

Features

- Untinted non diffused lens
- Utilizing ultrabright AlInGaP (AS) and InGaN technology
- High luminous intensity
- High operating temperature: T_j (chip junction temperature) up to 125 °C for AlInGaP devices
- Luminous intensity and color categorized for each packing unit
- ESD-withstand voltage: 2 kV acc. to MIL STD 883 D, Method 3015.7 for AlInGaP, 1 kV for InGaN
- Lead-free device

Applications

Interior and exterior lighting
Outdoor LED panels
Instrumentation and front panel indicators
Central high mounted stop lights (CHMSL) for motor vehicles
Replaces incandescent lamps
Traffic signals
Light guide design

Parts Table

Part	Color, Luminous Intensity	Angle of Half Intensity ($\pm\phi$)	Technology
TLCS5100	Red, I_V 7500 mcd (typ)	9 °	AlInGaP on GaAs
TLCR5100	Red, I_V 12000 mcd (typ.)	9 °	AlInGaP on GaAs
TLCO5100	Orange, I_V 12000 mcd (typ.)	9 °	AlInGaP on GaAs
TLCY5100	Yellow, I_V 10000 mcd (typ.)	9 °	AlInGaP on GaAs
TLCY5101	Yellow, I_V 6900 mcd to 16000 mcd	9 °	AlInGaP on GaAs
TLCYG5100	Yellow green, I_V 3500 mcd (typ.)	9 °	AlInGaP on GaAs
TLCPG5100	Pure green, I_V 1250 mcd (typ.)	9 °	AlInGaP on GaAs
TLCTG5100	True green, I_V 6000 mcd (typ.)	9 °	InGaN on SiC
TLCBG5100	Blue green, I_V 6000 mcd (typ.)	9 °	AlInGaP on GaAs
TLCB5100	Blue, I_V 1500 mcd (typ.)	9 °	InGaN on SiC

Ozone Depleting Substances Policy Statement

It is the policy of Vishay Semiconductor GmbH to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

We reserve the right to make changes to improve technical design
and may do so without further notice.

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Semiconductors products for any unintended or unauthorized application, the buyer shall indemnify Vishay Semiconductors against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.

Vishay Semiconductor GmbH, P.O.B. 3535, D-74025 Heilbronn, Germany
